Assessment Requirements for UEEEC0077

Verify functionality and compliance of custom electronic installations

Release: 1

Assessment Requirements for UEEEC0077 Verify functionality and compliance of custom electronic installations

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least two separate occasions and include:

- applying relevant risk identification, assessment, reporting and control requirements
- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including the use of risk control measures
- applying sustainable energy principles and practices
- completing reporting in accordance with workplace procedures
- complying with relevant regulations
- conducting all tests safely and correctly
- coordinating work with relevant person/s
- dealing effectively with unplanned events
- identifying and accessing materials, tools, apparatus and testing devices
- identifying non-compliant defects from test results
- identifying visual defects
- isolating circuits/machines/system
- recommending appropriate corrective actions.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- custom electronic installations, testing and verification methods, including:
 - audio reproduction, electronic components:
 - preamplifiers amplifier
 - power and integrated amplifiers
 - graphic equalisers
 - audio reproduction and speaker fundamentals
 - audio/video recording and replay components repair basics

- audio/video control equipment
- electronic safe working practices
- relevant standards, codes and regulations
- sound reproduction fundamentals
- video systems installation
- relevant manufacturer specifications
- relevant safe work method statements (SWMS)/job safety assessments or risk mitigation processes
- relevant WHS/OHS legislated requirements
- relevant workplace documentation
- relevant workplace policies and procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in suitable simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- resources that reflect current industry practices in relation to verifying compliance and functionality of custom electronic installations
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.
