UEESS00107 Sustainable - Energy Efficiency Systems Developer

Release: 2

UEESS00107 Sustainable - Energy Efficiency Systems Developer

Modification History

Release	Action	Core/Elective	Details	Points
2	Update	N/A	Mapped skill set requirements	

Description

Not applicable.

Pathways Information

The units of competency in this skill set will contribute to the completion of relevant Diploma and Advanced Diploma qualifications from the UEE11 Electrotechnology Training Package. Please consult the packaging rules of the relevant qualification for further advice.

Licensing/Regulatory Information

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

UEENEEE078B	Contribute to risk management in electrotechnology systems
UEENEEE124A	Compile and produce an energy sector detailed report
UEENEEE129A	Solve electrotechnical engineering problems
UEENEEG131A	Evaluate performance of low voltage electrical apparatus
UEENEEK132A	Develop strategies to address environmental and sustainability issues in the energy sector
UEENEEK146A	Design energy management controls for electrical installations in buildings
UEENEEK151A	Develop effective engineering strategies for energy reduction in buildings

Target Group

It is essential that anyone undertaking this skill set already holds a degree in Electrical Engineering, an Advanced Diploma or Diploma of Electrical Engineering or an electrical trade qualification from the Electrotechnology Training Package or equivalent.

Suggested words for Statement of Attainment

This Skill Set from the UEE11 Electrotechnology Training Package meets the industry requirements for an Energy Efficiency Systems Developer
