 - information technology for communication
- industrial awards and employee entitlements
- problem solving, decision making and conflict resolution techniques
- relevant industry standard operating procedures, site-specific safety legislation and requirements, and workplace policies and procedures
- relevant job safety assessments or risk mitigation processes, including risk management techniques for gas utilities industry
- relevant WHS/OHS and environmental legislated requirements
- relevant WHS/OHS management system
- relevant workplace documentation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.
