**Assessment Requirements for UEGNSG114
Coordinate and monitor implementation of
a risk management plan for a utilities
industry facility**

Assessment Requirements for UEGNSG114 Coordinate and monitor implementation of a risk management plan for a utilities industry facility

Modification History

Release 1. This is the first release of this unit of competency in the UEG Gas Industry Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least two separate occasions and include:

- applying problem solving, decision making and conflict resolution techniques
- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including:
 - applying workplace procedures and practices
 - using risk control measures
- applying sustainable energy principles and practices
- dealing effectively with unplanned events in accordance with workplace procedures, in a manner that minimises risk to personnel and equipment
- determining emergency management response techniques
- developing emergency response management plan, including:
 - first aid and welfare
 - recovery and post-recovery plans
 - legislative requirements
 - interaction with authorities/emergency services
 - communication with key stakeholders
 - initial response/assessment and make safe
- identification and implementation of risk control measures
- implementing relevant organisational policies and procedures
- implementing risk management plan and WHS/OHS practices and principles for a gas utilities industry facility
- resolving conflict with internal or external stakeholders
- reviewing risk management plan.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include

knowledge of:

- emergency management concepts and principles, including:
 - auditing and planning
 - systems analysis
 - policies and procedures for non-employees and contractors
 - types of emergencies
 - dealing with an emergency
 - elements of an emergency response plan
 - employee assistance programs
- emergency response and management plan
- principles and guidelines, including critical incident analysis
- problem solving, decision making and conflict resolution techniques including:
 - the decision-making environment
 - group decision making
 - guidelines for making decisions
 - decision making aids and support systems
 - negotiation with internal and external stakeholders
 - the nature of negotiation
 - strategy and tactics of bargaining
 - pre-negotiation essentials
 - communication in negotiation
- relevant job safety assessments or risk mitigation processes
- relevant risk management and WHS/OHS legislated requirements, practices and principles, including:
 - developing hazard checklists
 - hierarchy of risk control
 - identifying hazards and their consequences
 - identifying hazards, assessing associated risks and implementing appropriate risk control measures
 - personal protective equipment (PPE) - strengths and weaknesses
 - reporting hazards, including hazardous events
 - risk assessment, risk control and risk control measures
- relevant legislated requirements, relevant industry standards and codes of practice for the gas industry
- relevant workplace documentation
- relevant workplace policies and procedures
- risk management plan.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.
