Liaise with third party and the community
to maintain pipeline integrity and
community safety**

Assessment Requirements for UEGNSG314 Liaise with third party and the community to maintain pipeline integrity and community safety

Modification History

Release 1. This is the first release of this unit of competency in the UEG Gas Industry Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying decision-making and conflict resolution techniques
- applying problem-solving and troubleshooting techniques
- applying relevant industry standards, guidelines, codes of practice, legislation and regulations
- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including:
 - emergency response procedures
 - hazard identification and reporting
 - implementing risk control measures
 - maintaining a safe clean workplace
 - selecting correct personal protective equipment (PPE)
- completing relevant workplace documentation
- conducting briefings
- conducting quality and safety checks
- conducting third party and community liaison to maintain pipeline integrity and community safety
- confirming system status
- finalising third party and community liaison
- following workplace procedures
- inspecting and testing pipeline equipment and systems
- interpreting technical drawings, plans and job requirements
- minimising waste
- obtaining and complying with relevant work permit
- planning to liaise with third parties and the community to maintain pipeline integrity and community safety
- providing solutions to clients
- working to timeframes.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- gas industry drawings, plans and materials
- gas industry products, processes and characteristics
- hazardous activities, including lifting, climbing, working in confined spaces and aloft, and use of power tools
- operation of relevant industry plant, equipment and materials
- oral and written communication techniques
- problem-solving, decision-making and conflict resolution techniques
- quality and safety checks
- relevant industry standards, guidelines, codes of practice and regulations
- relevant safe work method statements (SWMS)/job safety assessments or risk mitigation processes
- relevant stakeholders, including:
 - authorised persons, authorities, clients and land owners and tenants
 - emergency response organisations
 - regulatory bodies
 - relevant customers and suppliers
 - workplace colleagues and managers
- relevant WHS/OHS legislated requirements, including:
 - hazards, risk assessment and control measures
 - environmental and sustainable energy principles and practices
 - PPE
 - hazard warnings and safety signs
- relevant work permits
- relevant workplace documentation, forms and reports
- relevant workplace policies and procedures
- transmission pipeline integrity and safety.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.
