UETDRDS013 Organise and implement ESI line and easement surveys

Release: 1

UETDRDS013 Organise and implement ESI line and easement surveys

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 2.0.

Application

This unit covers the surveying of distribution and sub-transmission lines and easements for activities associated with the design and installation of electrical equipment. This activity encompasses the use of instruments, such as compasses, inclinometer and distance measuring devices, in accordance with customer requirements, nominated design specifications and company processes.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace subject to regulations for undertaking of electrical work.

Other conditions may apply under state and territory legislative and regulatory licensing requirements which must be confirmed prior to commencing this unit.

Pre-requisite Unit

UEENEEE101A Apply Occupational Health and Safety regulations, codes and practices in the workplace

UEENEEE104A Solve problems in d.c. circuits

UEENEEE107A Use drawings, diagrams, schedules, standards, codes and specifications

UEENEEG101A Solve problems in electromagnetic devices and related circuits

UEENEEG102A Solve problems in low voltage a.c. circuits

UETDRDS014 Prepare and manage detailed construction plans for electrical power system infrastructure

UETDREL001 Apply environmental requirements

UETDREL005 Work safely in the vicinity of live electrical apparatus

UETDRIS005 Implement & monitor power system environmental & sustainable energy management policies & procedures

UETDRIS006 Implement and monitor the power system organisational WHS/OHS policies, procedures and programs

Competency Field

Design

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan and coordinate the organisation and implementation of line and easement surveys

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Work health and safety (WHS)/occupational health and safety (OHS) practices/procedures and environmental and sustainable energy procedures, which may influence the organisation and implementation of line and easement surveys, are reviewed and determined
 - 1.2** Purpose of the line and easement surveys is established and expected outcomes of the work are confirmed with appropriate personnel
 - 1.3** Organisational established procedures on policies and specifications for the design are obtained or established with appropriate personnel
 - 1.4** Equipment/tools and personnel protective equipment (PPE) are selected and coordinated based on specified requirements and established procedures
 - 1.5** Work is prioritised and sequenced for the most efficient and effective outcome following consultation with others for completion within acceptable timeframes, to a quality standard and in accordance with established procedures
 - 1.6** Risk control measures are identified, prioritised and evaluated against the work schedule
 - 1.7** Relevant work permits are secured to coordinate the performance of work according to requirements and/or established procedures
 - 1.8** Resources, including personnel, equipment, tools and PPE, required for the job are identified, scheduled and
-

coordinated and confirmed safe and in technical working order

1.9 Liaison and communication issues with others/authorised personnel, authorities, clients and landowners are resolved and activities coordinated to carry out work

1.10 Site is prepared according to the work schedule and to minimise risk and damage to property, commerce and individuals in accordance with established procedures

1.11 Personnel participating in the work, including plant operators and contractors, are fully briefed and respective responsibilities coordinated and authorised, where applicable, in accordance with established procedures

1.12 Positioning of road signs, barriers and warning devices is planned in accordance with requirements

2 Carry out and coordinate the organisation and implementation of line and easement surveys

2.1 Circuit/systems modelling is used to evaluate alternative proposals in accordance with established procedures

2.2 WHS/OHS and sustainable energy principles, functionality and practices to reduce the incidence of accidents and minimise waste are incorporated into the project in accordance with requirements and/or established procedures

2.3 Survey project decisions are made on the basis of safety and effective outcomes according to requirements and/or established procedures

2.4 Mathematical models of the distribution system are used to analyse the effectiveness of the finished project in accordance with requirements and established procedures

2.5 Technical advice is given to potential hazards, safety risks and control measures so that monitoring and preventative action can be undertaken and/or appropriate authorities consulted, where necessary, in accordance with requirements and established procedures

2.6 Essential knowledge and associated skills are applied to analyse specific data and compare it with compliance

	specifications to ensure completion of the project within an agreed timeframe according to requirements
	2.7 Solutions to non-routine problems are identified and actioned using acquired essential knowledge and associated skills according to requirements
	2.8 Quality of work is monitored against personal performance agreement and/or established organisational and professional standards
	2.9 Work teams/groups are arranged/coordinated/evaluated to ensure planned goals are met according to established procedures
3 Complete and coordinate the organisation and implementation of line and easement surveys	3.1 Final assessment of the surveys is undertaken to ensure they comply with all requirements and include all specifications and documentations needed to complete the design brief
	3.2 Appropriate personnel are notified of completion and reports and/or completion documents are finalised
	3.3 Reports and/or completion documents are submitted to relevant personnel/organisations for approval and, where applicable, statutory or regulatory approval
	3.4 Approved copies of survey documents are issued and records are updated in accordance with established procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the UET Transmission, Distribution and Rail Sector Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to UETTDRDS45 Organise and implement ESI line and

easement surveys.
