Assessment Requirements for UETDRSB003 Commission and maintain distribution field devices

Release: 1

Assessment Requirements for UETDRSB003 Commission and maintain distribution field devices

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least two (2) separate occasions and include:

- applying relevant legislation, regulations, standards, codes of practice and organisational workplace requirements including:
 - work health and safety (WHS)/occupational health and safety (OHS) requirements
- identifying hazards, assessing risks, and identifying, applying and monitoring control measures
- obtaining, inspecting and using relevant personal protective equipment (PPE)
- dealing with an unplanned event on at least one (1) occasion
- obtaining and signing relevant work permits in accordance with workplace requirements
- completing relevant work records, reports and documentation
- completing four (4) of the following commissioning and maintenance activities:
 - confirming device construction specifications
 - applying device settings
 - performing secondary injections
 - performing timing checks
 - confirming remote operations
 - performing earthing checks
 - performing calibrations
- performing commissioning and maintenance of at least six (6) of the following distribution field devices components:
 - automatic circuit reclosers (ACRs)
 - fuses
 - circuit breakers
 - transformers
 - gas switches
 - sectionalisers
 - regulators
 - capacitors

- reactors
- mobile phone systems
- mobile radio systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- relevant legislation, regulations, standards, codes of practice and organisational workplace requirements including WHS/OHS requirements
- hazard, risk assessment and risk control requirements, including potential hazards
- types and application of PPE
- safe use of plant, tools and equipment
- application, purpose and types of permits and access authorities
- events constituting an unplanned event or incident
- procedures for responding to an unplanned event or incident
- workplace records, reports and documentation requirements
- evaluation of equipment serviceability
- identification and procurement of materials and apparatus
- manuals, system diagrams and drawings
- commissioning and maintenance procedures for distribution field devices
- principles and operating parameters of distribution field devices, including:
 - automatic circuit reclosers (ACRs)
 - fuses
 - circuit breakers
 - transformers
 - gas switches
 - sectionalisers
 - regulators
 - capacitors
 - reactors
 - mobile phone systems
 - mobile radio systems.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so.

Where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including workplace requirements, equipment specifications, regulations, codes of practice and operation manuals.
