UETDRTS037 Maintain and calibrate protection relays and meters

Release: 1

UETDRTS037 Maintain and calibrate protection relays and meters

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 4.0.

Application

This unit includes the skills and knowledge required to maintain and calibrate protection relays and meters in the electricity supply industry (ESI).

It includes the repair, calibration and testing of various types of protection relays, including electromechanical, analogue, digital electronic and numerical devices.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace subject to regulations for undertaking of electrical work.

Other conditions may apply under state and territory legislative and regulatory licensing requirements which must be confirmed prior to commencing this unit.

Pre-requisite Unit

UEECD0007 Apply work health and safety regulations, codes and practices in the workplace

UEECD0010 Compile and produce an energy sector detailed report

UEECD0019 Fabricate, assemble and dismantle utilities industry components

UEECD0044 Solve problems in multiple path circuits

UEECD0046 Solve problems in single path circuits

UEECD0051 Use drawings, diagrams, schedules, standards, codes and specifications

UEEEL0020 Solve problems in low voltage a.c. circuits

UEEEL0021 Solve problems in magnetic and electromagnetic devices

UETDREL005 Work safely in the vicinity of live electrical apparatus

UETDRTS036 Develop secondary protection and control scheme isolation and restoration documents

Competency Field

Testing

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare to maintain and calibrate protection relays and meters

- 1.1** Workplace organisational requirements for the maintenance and calibration of relays and meters, are reviewed and determined
- 1.2** Purpose of the maintenance and calibration of relays and meters is established
- 1.3** Testing procedures are discussed and reviewed with appropriate personnel
- 1.4** Testing parameters are established from workplace organisational requirements
- 1.5** Tools, equipment and personal protective equipment (PPE) required for work are determined, obtained and confirmed in working order
- 1.6** Work is prioritised and sequenced for completion in accordance with workplace requirements
- 1.7** Relevant stakeholders are identified and liaised with
- 1.8** Hazards are identified, risks assessed, and control measures identified
- 1.9** Work permits are organised in accordance with workplace requirements

2 Maintain and calibrate protection relays and meters

- 2.1** Relevant stakeholder liaison and work permits are applied
- 2.2** Manual handling and use of tools, equipment and PPE are carried out in accordance with workplace requirements
- 2.3** Hazard control measures are applied and monitored in accordance with workplace requirements

- | | | |
|--|------------|--|
| | 2.4 | Protection relays and meters are maintained, tested and calibrated in accordance with workplace requirements |
| | 2.5 | Solutions to non-routine problems are identified and actioned |
| | 2.6 | Quality checks of work are undertaken in accordance with workplace requirements |
| 3 Complete work and documentation | 3.1 | Completed work is checked for compliance against workplace requirements |
| | 3.2 | Relevant stakeholders are notified of completion and reports and/or completion documents are finalised |
| | 3.3 | Commissioning and maintenance documentation is completed in accordance with workplace requirements |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the UET Transmission, Distribution and Rail Sector Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is not equivalent to UETDRTS023 Repair, test and calibrate protection relays and meters.

Assessment Requirements for UETDRTS037 Maintain and calibrate protection relays and meters

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two (2) separate occasions and include:

- identifying hazards, assessing risks, and identifying, applying and monitoring control measures
- determining the preparation required for the maintenance and calibration of protection relays and meters
- maintaining and calibrating four (4) of the following protection devices:
 - overcurrent
 - voltage regulating
 - current differential
 - impedance
 - feeder protection
 - phase comparison.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- testing equipment, techniques and procedures
- electrical equipment associated with protection relays and meters, including:
 - types and applications
 - characteristics, capabilities and operating procedures
 - diagrams and operating manuals
 - maintenance and calibration.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so.

Where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace requirements, relevant industry standards, equipment specifications, and operation manuals.
