UETTDRCJ23 Install and maintain de-energised high voltage underground paper insulated cables

Release: 1

UETTDRCJ23 Install and maintain de-energised high voltage underground paper insulated cables

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Application

This unit involves the skills and knowledge required to install and maintain de-energised high voltage (HV) underground paper insulated cables in the electricity supply industry (ESI).

It includes completing and updating system data/maintenance records of de-energised HV underground paper insulated cables, jointing, terminating, repairing and replacing cables. It also includes isolating cables, issuing permits and undertaking pre-commissioning tests.

De-energised means separated from all sources of supply but not necessarily isolated, earthed, discharged or out of commission.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace.

Other conditions may apply under state and territory legislative and regulatory licensing requirements which must be confirmed prior to commencing this unit.

Pre-requisite Unit

Common Unit Group

UEENEEE101A Apply Occupational Health and Safety regulations, codes and practices in the workplace

UEENEEE102A Fabricate, assemble and dismantle utilities industry components

UEENEEE104A Solve problems in d.c. circuits

UEENEEE105A Fix and secure electrotechnology equipment

UEENEEE107A Use drawings, diagrams, schedules, standards, codes and specifications

UEENEEG101A Solve problems in electromagnetic devices and related circuits

UEENEEG102A Solve problems in low voltage a.c. circuits

UETTDRCJ21 Lay ESI electrical cables

UETTDRCJ26 Install and maintain de-energised low voltage underground polymeric cables

UETTDRCJ27 Install and maintain de-energised high voltage underground polymeric cables

UETTDREL11 Apply sustainable energy and environmental procedures

UETTDREL12 Operate plant and equipment near live electrical conductors and apparatus

UETTDREL16 Working safely near live electrical apparatus

UETTDRI41 Install network infrastructure electrical equipment

UETTDRI42 Maintain network infrastructure electrical equipment

UETTDRI55 Install and maintain low voltage underground services

Competency Field

Cable Jointing

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to joint and maintain de-energised HV underground paper insulated cables

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Work schedules, plans, drawings, workplace procedures and material lists are received and confirmed
- 1.2** Job requirements and workplace procedures are identified and communicated with relevant personnel
- 1.3** Work health and safety (WHS)/occupational health and safety (OHS), environmental and workplace procedures for the installation and maintenance of de-energised HV underground paper insulated cables are obtained and confirmed for the purposes of the work to be performed
- 1.4** Work is prioritised and sequenced for completion within acceptable timeframes following consultation with relevant personnel and in accordance with workplace procedures
- 1.5** WHS/OHS and environmental hazards are identified, risks are assessed and control measures identified in accordance with workplace procedures

- | | | |
|----------|---|--|
| | 1.6 | Relevant work permits are obtained, understood and signed in accordance with workplace procedures |
| | 1.7 | Plant, equipment, tools and personal protective equipment (PPE) required for work are identified, obtained and confirmed in working order |
| | 1.8 | Worksite is prepared to minimise risk, damage to property, commerce and individuals in accordance with workplace procedures |
| | 1.9 | Traffic management plan is confirmed as being applied in accordance with workplace procedures |
| 2 | Carry out installation and maintenance of de-energised HV underground paper insulated cables | |
| | 2.1 | WHS/OHS, sustainable energy and environmental principles and practices are monitored and followed to reduce incidents of accidents in accordance with workplace procedures |
| | 2.2 | Requirements for lifting and/or climbing and/or working at heights and the use of power tools/equipment are followed in accordance with workplace procedures |
| | 2.3 | Cables are tested in accordance with workplace procedures |
| | 2.4 | Cables are prepared for jointing, terminating or maintaining in accordance with construction drawings, manufacturer instructions and workplace procedures |
| | 2.5 | Cables are jointed, terminated or maintained in accordance with construction drawings, manufacturer instructions and workplace procedures |
| | 2.6 | Unplanned events in the installation and maintenance of de-energised HV underground paper insulated cables are responded to in accordance with workplace procedures |
| | 2.7 | Quality checks of work are undertaken in accordance with workplace procedures |
| 3 | Complete installation and maintenance of de-energised HV underground paper insulated cables | |
| | 3.1 | Completed work is checked against work plan, construction plans and drawings for compliance and anomalies are reported in accordance with workplace procedures |
| | 3.2 | WHS/OHS and environmental incidents are reported in |

accordance with workplace procedures, as required

- 3.3 Worksite is rehabilitated, cleaned up and made safe in accordance with workplace procedures
- 3.4 Tools, equipment and surplus resources are, where appropriate, cleaned, checked and returned to storage in accordance with workplace procedures
- 3.5 Relevant work permits are signed off in accordance with workplace procedures
- 3.6 Work records, reports and/or documentation are completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to UETTDRCJ23A Install and maintain de-energised high voltage underground paper insulated cables.

Assessment Requirements for UETTDRCJ23 Install and maintain de-energised high voltage underground paper insulated cables

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including the use of risk control measures
- applying sustainable energy principles and practices
- using at least one (1) of the following:
 - paper/lead sheathed
 - high voltage (HV) paper/aluminium sheathed
- using at least one (1) of the following:
 - straight through joint
 - parallel branch joint
- completing at least one (1) of the following:
 - transformers
 - ring main units
 - chamber substations
- installing at least one (1) of the following:
 - busbar/termination boxes
 - links/fuses
 - termination boxes
 - control gear
- installing at least two (2) of the following:
 - resin filled boxes
 - polymeric tape
 - heat shrink
 - 'slip-on' moulds
 - pre-stretched polymeric
 - compound filled boxes
- completing at least two (2) of the following:
 - lugs and ferrules

- compression joints
- soldered joints
- mechanical connectors
- using all of the following:
 - cable identification devices
 - cable spiking devices
- using all of the following:
 - insulation resistance testers
 - moisture testing equipment
- dealing with unplanned events on at least one (1) occasion.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- requirements for the use of enterprise manuals, system diagrams/plans and drawings
- types of tools and equipment
- types of HV cables
- structure of HV cables
- techniques for the jointing, terminating and repairing of HV paper insulated cables
- methods of testing cables after jointing.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment (PPE) currently used in industry for installing and maintaining de-energised HV underground paper insulated cables
- applicable documentation, including workplace procedures, relevant industry standards, equipment specifications, regulations, codes of practice and operation manuals.
