Assessment Requirements for UETTDRSB38 Commission power system distribution field devices

Release: 1

Assessment Requirements for UETTDRSB38 Commission power system distribution field devices

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including the use of risk control measures
- applying sustainable energy principles and practices
- undertaking all of the following:
 - applying device settings
 - secondary injections
 - timing
 - remote operations
 - earthing checks
 - calibrations
- undertaking commissioning and testing of power system distribution field devices including at least three (3) of the following:
 - automatic circuit reclosers (ACRs)
 - gas switches
 - regulators
 - line capacitors
 - mobile phone systems
 - trunked mobile radio (TMR) systems
- dealing with unplanned events on at least one (1) occasion.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- commissioning procedures associated with distribution protection and control systems encompassing:
 - standards, codes, Commonwealth/state/territory legislation, supply authority regulations

and/or enterprise requirements associated with the commissioning procedures

- requirements for the use of commissioning manuals, system diagrams/plans and drawings
- techniques in commissioning procedures – planning, policies and testing techniques
- close out requirements.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.
